**CONCRETE CUTTING,
CORING, AND
BREAKING & REMOVAL**
IT'S WHAT WE DO

BREAKING & REMOVAL

Penhall Company provides an extensive range of concrete breaking and removal services for various project types - from skid-steers to excavators we tackle projects large and small.

WIRE SAWING

With projects such as the Schuyler F. Heim Bridge in Long Beach, CA, we use an innovative approach with wire sawing where other methods don't cut it. Operated by a pulley system, our wire saws cut whatever is needed.

WALL SAWING

Generally used for HVAC and doorway openings, our wall saws are incredibly precise. Operated remotely our saws cut anywhere from shallow to deep depths.

CORE DRILLING

Core drilling is a necessary step at some point for virtually all concrete structures - whether it's for the installation of new utilities, to aide in demolition, or sample testing, quality cores are a must.

FLAT SAWING

From just a small score, to deep cuts, our flat saws cut a range of depths through both asphalt and concrete. With equipment and labor resources throughout the country we have both the horsepower and manpower to complete your project.

HAND SAWING

We use a variety of hand saws ranging from electric, gas, and hydraulic powered. Primarily used for tight quarters and situations where hand demolition is needed - our sawing options have you covered.
