**CONCRETE SCANNING,  
DIGITAL X-RAY IMAGING,  
& UTILITY LOCATING**

## WHY PENHALL TECHNOLOGIES?

Our GPR scanning, x-ray imaging, and utility locating services allow our customers to identify subsurface objects or hazards before they cut into concrete. Penhall Technologies' services are highly recommended prior to any cutting project.

- Reduce your safety risk, keeping everyone on the job site safe.
- Reduce financial exposure.
- Save time, knowing exactly where to cut or drill to avoid hazards and costly delays.

### DIGITAL CONCRETE X-RAY

Penhall Technologies proudly offers industry leading advancements in x-ray imaging with our digital x-ray solution. Unlike traditional x-ray services which use highly toxic isotopes, our x-ray machine can be turned on and off – eliminating constant exposure to radiation. We also capture images digitally which speeds up processing time by a factor of 4, when compared to using film.

### UTILITY LOCATING

WHAT WE LOCATE

- Gas Lines
- Power Lines
- Communication Lines
- Waste Piping
- Cable Lines
- Underground Storage Tanks
- Underground Pipes

### GPR SCANNING

WHAT WE FIND

- Pipes and Conduits
- Post-Tension Cables
- Utilities and Live Wires
- Rebar and Rebar Patterns
- Voids within the Concrete
- Structural Integrity of the Concrete

**PENHALL TECHNOLOGIES IS A PROUD MEMBER OF THE CGA FOR STANDARD UTILITY LOCATING**
